**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pozatto (6,458,122) in view of Farin et al (4,860,745).

Pozzato discloses a method of regulating the power available at an electrode carried by a manipulator of an electronic scalpel for cutting tissue and coagulating blood, said scalpel (42) having a rectifying circuit (20) for supplying a rectified and direct voltage; a radio frequency circuit (30) including a pilot circuit (306, Fig 2) having a wave signal input, said radio frequency circuit producing a current carrier signal at a main frequency (abstract lines 5-8), said method comprising the steps of: producing a modulating signal (at 10); combining the modulating signal and the current carrier signal (Fig 2) to produce a wave form having two or three harmonics resulting from the combination of said current carrier signal and of the modulating wave (harmonics are inherently produced), applying the wave form to the electrode of the manipulator (42); regulating the amplitude of said wave form in order to avoid destroying tissue (column 1 lines 49-54), including at least one of varying the amplitude of the wave signal applied to said pilot circuit and varying said rectified and direct voltage supplied to said radio frequency circuit (column 3 lines 36-56). The reference fails to disclose regulation of the amplitude producing harmonics to effect coagulation in the claimed temperature range.

Farin et al disclose a similar device and method in which amplitude regulation produces a wave form including harmonics to effect coagulation in the desired range. Applicant's attention is directed to Figure 4; column 4, line 57; column 8, lines 15-48; and column 15, line 53+. Given

this teaching, it would have been obvious to the skilled artisan to modify Pozzato with such features to effect more efficient coagulation since a predictable result would ensue.

***Response to Amendment***

The previously indicated allowability of claim 1 is hereby withdrawn in light of the new rejection supra.

***Allowable Subject Matter***

Claims 4, 5, and 7-14 are allowed.
